<b>Office Action Summary</b>	<b>Application No.</b> 10/596,803	<b>Applicant(s)</b> CASHMAN, JOHN R.	
	<b>Examiner</b> Patricia L. Morris	<b>Art Unit</b> 1625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2009.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

### **DETAILED ACTION**

Claims 1, 6, 41, 59, 62, 65, 72, 74 and 89 are under consideration in this application.

Claims 2, 4, 5, 7, 9-12 and 73 are held withdrawn from consideration as being drawn to non-elected subject matter 37 CFR 1.142(b).

### ***Election/Restrictions***

Applicant's election without traverse of Group III and compound no. 14 in Table 1 on page 43 of the specification in the reply filed on November 13, 2009 is acknowledged.

This application has been examined to extent readable on the elected compound, *i.e.*, 3-(1H-imidazol-5-yl) pyridine, exclusively. The search will not be extended because applicants are claiming a compound well known in the prior art. The prior art of record is just a sampling of the numerous prior art references.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, 41, 59, 62, 65, 72, 74 and 89 are rejected under 35 U.S.C. 102(a), (b) and/or (e) as being anticipated by Yamamoto (CA 35:38263 (1941), Heathcote et al. (CA 33:61044

Art Unit: 1625

(1939), Bouchet et al. (US 6,353,108), Dolby et al. (US 7,183,305) and Kirchoff et al. (Organic Process Research & Development 2001, 5, 50-53).

Yamamoto, Heathcote et al. Bouchet et al., Dolby et al. and Kirchoff et al. specifically recite the instant compound. Note RN 51746-85-1 in Yamamoto and Heathcote et al., example 1 of Bouchet et al., example 10 of Dolby et al. or compound 3 of Kirchoff et al. Hence, the instant compound is deemed to be anticipated therefrom.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 6, 41, 59, 62, 74 and 89 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teachings of Yamamoto, Heathcote et al., Bouchet et al., Dolby et al. and Kirchoff et al. in view of Imoto et al. (US 2003/0100769).

Art Unit: 1625

Yamamoto, Heathcote et al., Bouchert et al., Dolby et al. and Kirchoff et al. disclose the claimed compound. The anticipatory nature of the references have been clearly identified in the previous section and hereby incorporated by reference.

It is believed that one having ordinary skill in the art would have found the claimed compounds prima facie obvious, since they embraced by the disclosed formulas; In re Susi, 440 F.2d 442, 169 USPQ 423 (CCPA 1971). See also In re Malagari, 499 F.2 1297, 182 USPQ 549 (CCPA 1974); In re Lemin, 332 F.2d 839, 141 USPQ 814 (CCPA 1964); In re Rosicky, 276 F.2d 656, 125 USPQ 341 (CCPA 1960). Moreover, Imoto et al. teach that analogous compounds are known to have good affinity for nicotinic acetylcholine receptors. Accordingly, one having ordinary skill in the art would have been motivated to prepare the compound disclosed by the references with the expectation that they would show affinity for nicotinic acetylcholine receptors.

It is believed well settled that a reference may be relied upon for all that it would have reasonably conveyed to one having ordinary skill in the art. In re Fracalossi, 681 F.2d 792, 215 USPQ 569 (CCPA 1982); In re Lamberti, 545 F.2d 747, 192 USPQ 278 (CCPA 1976); In re Rinehart, 531 F.2d 1048, 189 USPQ 143 (CCPA 1976); In re Susi, supra.
